CP-03 Blue	CP-09 Gold Royale	
CP-04 Gold	CP-10 Moss Green	
CP-05 Violet	CP-11 Fine Blue	
CP-06 Red2Green	CP-12 Sparkle Silver	

ClassicFx Pearls are true mica based pearlescents used in the automotive industry for decades. Shown over black in the above photos but can be used over any color to add a "3D" effect of sorts to colors. Weather treated for exterior use the pearls are built to last. Use as a midcoat over your base color, or add to your color for color effects. Available in liquid (premixed with our IC-101) or dry form so you can customize your look.

Due to the complexities of computer, monitor, and printer selections we can not guarantee the colors you see and/or print will accurately represent the final products. In fact, we feel these photo shots don't do these colors justice! It is very difficult to capture the true brilliance of these products on a camera. Try them and you will see for yourself what everyone that has seen them in person is talking about! No guarantee of color match to this card is implied or warranted.
