KemFx is proud to bring you KolorSeal(tm) 2K urethane primer sealer colors! These colored sealers spray easily to form smooth films that acts as a great foundation for basecoats or topcoats. Available in a wide range of colors to improve coverage of color topcoats and reduce the visibility of gouges and stone chips that sometimes arise throughout the service life of any paint system. Built with urethane prepolymers and lightfast pigments this system can be exposed to light but should be overcoated for long lasting protection. Each color is activated 4 parts color to 1 part UA series activator and reduce with 1 part UR series reducer. Visit www.kemfx.com for more information.

Due to the complexities of computer, monitor, and printer selections we can not guarantee the colors you see and/or print will accurately represent the final products. In fact, we feel these photo shots don't do these colors justice! It is very difficult to capture the true brilliance of these products on a camera. Try them and you will see for yourself what everyone that has seen them in person is talking about! No guarantee of color match to this card is implied or warranted.
